

March 10, 2026: On the State of American Police and Government

I am writing this to factually record that I have officially contacted every law enforcement agency that has jurisdiction over the matter of an unlawful spying force being used to control people on the ground near my home as a form of threatening harassment and intimidation.

I have reported this to the Federal Bureau of Investigation (FBI), to the United States Secret Service (as an employee misconduct complaint), to the Texas Rangers (as a public corruption complaint), and to the San Antonio Police Department (as a complaint about harassment from locals in the area).

Not one single law enforcement agency wanted to know any details of the facts that I am presenting for review and investigation.

I am firmly presented with the facts of our current life to be as follows (let's just pretend that this is an IF):

IF a team of people within the government were to illegally spy on a person's computer life, personal life, public life, and any other form of intrusion that they could muster, and

IF that team of spies from inside of the government were to control a group of people on the ground around that person to follow them, harass them, and bother them, and

IF a person being subject to that type of spying, stalking, and harassment were to complain to the police (any police department that would rightfully have jurisdiction over the matter) that this were happening to them;

THEN, law enforcement would have absolutely no interest in recording this as a crime, obtaining information about the details of these offenses, and would take absolutely no steps to help that person in any way whatsoever.

These are facts that have been established by my personal efforts to report this activity to law enforcement in the San Antonio, Texas, and United States governments.

I can personally attest to the fact that the officers will not take an interest in this matter, they will investigate you and your life instead of taking any interest at all in investigating a possible criminal conspiracy coming from inside of the government itself.

So, this leaves me with another important conclusion: NOBODY IS INVESTIGATING THE GOVERNMENT FOR CRIMINAL BEHAVIORS EXCEPT THE GOVERNMENT ITSELF.

We, the People, have absolutely zero access to the inner workings of the government which works as a 'black box' of activity now. I filed numerous public information act requests for important information and they were ignored. After filing lawsuits to obtain this important information, the lawsuits were (unlawfully and illegally) dismissed.

So, the final conclusion is that THE GOVERNMENT IS THE ONLY PARTY IN THE WORLD THAT CAN INVESTIGATE THE GOVERNMENT. Press? Freedom of Press? I am still waiting for my story to break the evening news cycle (Yes, I have reported it to our local press as well and received no response whatsoever).

United States citizens, and people of the world that are interested: the USA government has no checks and balances that are currently operating and nobody is monitoring it for criminal behaviors.

The government is not policing itself and I am personally experiencing illegal spying, attempts to 'communicate' with my home by driving vehicles past the front of it, walking people past the front of it, blowing horns into it, shining lights into it (one person did shine a gun's laser scope at me through my window), and any number of 'acoustic bombardment' activities that I have been documenting for years now;

I have been threatened by a man with a gun, and did shoot that gun, in my front yard (that is on video - you can't really dispute that now can you?)(of course I reported that to the police); and

I am made to understand that the most minute of my behaviors is being 'monitored' or 'managed' by some outside force that is

completely unidentifiable (except for the evidence that I am able to gather myself as proof),

completely unaccountable to law or oversight (I have tried literally everything I know to do, including contacting dozens of members of our government, and oversight committees), and

completely immune from investigation by law enforcement.

So, let us just 'pretend' for a moment that I am speaking the truth to the world (and *seriously*, do you not believe me at this point?):

IF Donald Trump and Elon Musk were using their access to the nation's spying technology to spy on, stalk, harass, bother, and attempt to extort or otherwise control American citizens, politicians, criminals, or anyone else,

THEN Donald Trump and Elon Musk would be completely free to do so without (even the fear of) any law enforcement or government agency intervention in any way whatsoever.

I swear that each of the statements contained in this message are true and correct to the best of my ability to translate them from my understanding to this writing.

Sincerely, and with great concern for the state of our nation,

Chris Noel Carlin,
The 2nd Savior, and
King of the World

(There is no authority more persuasive or law abiding as this one anymore. It certainly cannot be found in the American government - and that entity previously represented the *gold standard* of government accountability. Now, after witnessing what I have witnessed, I am confident that you can rely upon my word more than any government official.)
